

ClearFlex

HEAT TRANSFER FLEX FILM

ClearFlex is the best solution for all white fabrics. Printed and heat applied, ClearFlex is so thin and flexible that it almost feels like a screen printed image. This transparent polyurethane flex film was developed for eco-solvent or solvent inks.

COMPOSITION

Base	Hotmelt Film (polyurethane)
Resin	Polyurethane

APPLICATION INFORMATION

- Application to cotton, poly/cotton, polyester
- Washing fastness up to 140°F (60°C)
- 15 seconds / 320°F (160°C)
- Medium / heavy pressure

TRANSFER TAPE

ClearFlex requires RTape's specially formulated **HotMask** transfer tape to lift your printed graphic from the carrier and then heat apply using a standard heat press. Ask your supplier for **HotMask** to assist and ensure the highest quality transfer.

Scan or create a digital vector image.

Print on our material with an ink jet printer.

Insert the printed film into a cutting-plotter and cut according to the outlines.

You do not need an application tape; weed the material and apply the printed logo with its polyester backing.
